

PRODUCT OVERVIEW

- MERV 11, 13, 15
- 2" high efficiency filter design
- Gradient dual density synthetic media
- Side gasketing available
- Max Temperature - 150°F
- Ideal for use in
 - Light Commercial
 - Manufacturing and Distribution
 - Health Care/Government Facilities
 - Schools/Universities
 - Hotels and Hospitality

NEXFIL[®] MINI-PLEAT

WHY THE NEXFIL MINI-PLEAT?

- Advanced media and design provides a high efficiency filter in a compact configuration
- Available in multiple sizes with no system modification required to increase IAQ levels from standard 2" pleats
- Low resistance to air flow results in energy savings
- Maximum flow rate of 625 fpm
- High level of filtration in a 2" depth to remove pollens, dust, molds and other airborne irritants
- High impact plastic frame creates an exceptionally durable lightweight filter
- Can be used in variable air volume systems (VAV) and 100% relative humidity applications
- Compact design saves shipping and storage space and minimizes handling
- Durable synthetic materials resist physical damage to the filter packs
- Sustainable component for a LEED/Green Building initiative
- Environmentally friendly
 - No metal corrosion
 - Fully incinerable
 - Reduces landfill waste

NEXFIL® MINI-PLEAT

PERFORMANCE DATA (24 x 24 x 2)

MERV	INITIAL RESISTANCE ("w.g.)			FINAL RESISTANCE ("w.g.)
	375 fpm	500 fpm	625 fpm	
11	0.19	0.27	0.36	1.5
13	0.25	0.36	0.48	1.5
15	0.34	0.46	0.60	1.5

Products tested and intended for installation with pleats in vertical orientation. First filter dimension corresponds to the vertical dimension

INITIAL RESISTANCE (24 x 24 x 2)

Durable media pack resists damage.

Plastic stiffening spar for increased pack rigidity on larger size filters.

MINIMUM REMOVAL EFFICIENCY (24 x 24 x 2)

ENGINEERING SPECIFICATIONS

1.0 General

- Filters shall be Aerostar® Nexfil mini-pleat air filters as manufactured by Filtration Group.
- Underwriters Laboratories classified to UL 900.
- Filters shall be available in a nominal depth of 2".
- ISO 9001:2015 certified quality management system.

2.0 Filter Materials of Construction

- Media shall be 100% synthetic, gradient dual density media that does not support microbial growth.
- Frame shall be constructed with high-impact plastic and impervious to moisture and high humidity.

- Media pack shall be adhered to plastic frame on all sides to prevent air by-pass.
- Filter shall have a hot melt bead separator to maintain pleat pack stability and ensure consistent pleat spacing for optimum air flow.

3.0 Filter Performance

- Filters shall be available in MERV 11 for low efficiency, MERV 13 for medium efficiency and MERV 15 for high efficiency when tested in accordance with ASHRAE 52.2 Test Standard.
- For initial resistance of filters, see Performance Data chart above.
- Filter shall be rated to withstand a continuous operating temperature up to 150°F.
- Filter shall have a recommended final resistance of 1.5" w.g.
